2023

GRATITUDE REPORT

## Legacy

William Goggin remembered WinnMed Foundation and WinnMed Ossian Clinic as he prepared for his end of life. He left us beautiful legacy gifts that are being utilized to expand services for area friends and families. William's estate gift to the foundation fully funded WinnMed's Wound Center. His gift, specifically for the Ossian Clinic, will ensure staff and patients have what they need on their healthcare journey.

*William grew up in Ossian and was the son of Dr. John Goggin. His father faithfully served patients for many years. William resided in Texas until his passing, but kept his hometown in his heart. He loved his black Labs and made his career in the Air Force and aviation field.*

## Transform

WinnMed Foundation holds a campaign every year that targets a very specific project at WinnMed.

In 2023, we were able to gift over \$130,000 for the region's first hyperbaric oxygen (HBO) chamber in WinnMed's Wound Center (pictured above), and we were able to do that because of you! Your gifts stay right here to help grow and expand services locally.

Hyperbaric oxygen therapy involves breathing pure oxygen in a pressurized environment. This therapy is indicated for certain non-healing wounds, such as a diabetic foot ulcer, radiation injury or osteomyelitis. A hyperbaric oxygen chamber has been proven to enhance tissue oxygenation, stimulate growth factors, reduce inflammation, fight infection and ultimately promote healing.

## Hope

Building a healthier community means investing in the quality of life today and for generations to come. WinnMed Foundation has several endowment funds with the Community Foundation of Northeast Iowa. Donors can choose funds that benefit families and friends who visit WinnMed.

## Believe

Thanks to the generous support of community partners, WinnMed Foundation is enhancing patient care initiatives through personal gifts and organizational grants. With donations from individuals, WinnMed Home Health and Hospice now provides music, pet, spiritual and massage services to patients. The Nutrition Department has also benefited from a grant from the Depot Outlet, enabling the purchase of a dish dollie for safe plate storage (pictured bottom left). Additionally, the inpatient staff received a grant from the Winneshiek County Community Foundation, facilitating the acquisition of an AccuVein® finder (pictured bottom right).
